

Turn security complexity into clarity with Insight + Microsoft

Discover how you can build resilience, increase efficiency, and maximise agility with a security partnership you can trust.

Insight + Microsoft: securing transformation together

In today's evolving threat landscape, security isn't optional - it's foundational.

That's why Insight and Microsoft partner to help organisations take a more strategic approach to security – one that safeguards digital transformation, supports AI and innovation, and optimises costs.

At Insight, we bring deep expertise in implementing, optimising, and managing security solutions. Combined with Microsoft's world-class technologies, we help our customers achieve their security and compliance goals with confidence.

The power of the partnership

Trusted expertise

Insight is a Microsoft Solutions Partner across Security, Azure, and Modern Work, bringing deep knowledge and experience to every engagement.

Advanced security solutions

We help customers migrate from Microsoft 365 E3 to E5, unlocking advanced security capabilities that strengthen protection and resilience.

Compliance confidence

We simplify compliance with evolving regulations such as NIS2, aligning your security posture with regulatory requirements.

Together, Insight and Microsoft help you move faster, stay secure, and unlock long-term value from your Microsoft investments.

Addressing today's security challenges

Organisations are under growing pressure to protect data, systems, and users across an increasingly complex IT landscape – while keeping pace with rapid digital transformation.

They must manage **expanding attack surfaces**, as hybrid and multi-cloud environments introduce new risks and complexity. New technologies such as AI also add to this challenge, introducing new data flows, models and tools that require careful governance and security oversight. At the same time, compliance demands like NIS2 are tightening, requiring stronger controls, improved visibility, and comprehensive reporting.

Security teams are also being asked to **prove ROI**, delivering measurable outcomes, not just deploying more tools.

Microsoft security solutions in focus

Insight and Microsoft deliver an integrated, intelligent security ecosystem that protects your entire digital estate.

Identity & Access Management (IAM)

Microsoft Entra ID (formerly Azure Active Directory) secures access to applications and resources through unified identity management, conditional access, and least-privilege controls.

Threat protection

The Microsoft Defender suite helps detect, prevent, and respond to threats across endpoints, emails, applications and identities – all from a single platform.

Compliance and governance

Microsoft Purview helps you manage risk, meet regulatory requirements, and protect sensitive data through tools like Compliance Manager and Insider Risk Management.

Cloud security

With Microsoft Sentinel and Microsoft Defender for Cloud, you gain end-to-end visibility, Security Information and Event Management (SIEM) + Security Orchestration, Automation and Response (SOAR) capabilities, and proactive threat detection across hybrid and multi-cloud environments.

Maximise security ROI with Insight

Insight combines deep expertise, a proven methodology, and end-to-end services to help you unlock the full value of Microsoft's security solutions – today and into the future.

1 Assessment and planning

We assess your current environment, mapping risks, compliance needs, and licensing, to build a clear, future-ready security roadmap.

2 Integration and deployment

From on-premise systems and cloud-based solutions to SaaS offerings and AI initiatives, we design and implement secure environments tailored to your business goals and regulatory requirements.

3 Optimisation

We help you benefit from the full value of Microsoft tools, ensuring seamless integration and measurable ROI.

4 Ongoing protection

Our managed Security Operations Centre (SOC), threat hunting, and incident response services keep your defences strong and proactive.

5 Enablement

Upskill your teams with expert-led workshops, training, and access to Microsoft-funded programmes that accelerate security outcomes.

Stronger together

Insight and Microsoft deliver more than just technology – we align strategy, accelerate transformation, and secure outcomes, so you can move forward with confidence.

Together, we help you take advantage of:

Secure transformation at speed

Enabling organisations to modernise and embrace new technologies such as AI quickly and securely, with measurable, real-world results.

Innovation and expertise

Microsoft's leading security solutions, powered by Insight's proven experience in implementation, optimisation and ongoing support.

End-to-end coverage

Strategy, compliance, deployment, and managed services – all delivered through one trusted partnership.

Future-ready security

Ensuring every investment aligns with your business goals, resilience needs, and long-term growth ambitions.

Take the next step toward secure transformation
