

Unleashing the Future of Commerce with Insight and Stripe

In an era where the speed of a transaction can define a brand's reputation, businesses need more than just a payment processor; they need a strategic engine for growth. Insight, in partnership with Stripe, is redefining what is possible in the commerce landscape. We don't just "plug in" payments; we architect seamless, intelligent, and scalable ecosystems that transform how you interact with your customers and manage your global operations.

The Business Challenge: Navigating Modern Commerce Complexity

Today's enterprises face a shifting landscape where legacy systems often become a bottleneck to innovation. Clients frequently encounter several critical hurdles:

- **Scaling Limitations:** Current infrastructures often struggle to handle spikes in transaction volume or the demands of global expansion.
- **Operational Friction:** Fragmented manual processes—such as moving funds between multiple platforms—create unnecessary risk and drain internal resources.
- **Technical Debt:** Modernising legacy gateways and security models to align with cloud-native architecture is a daunting task that many firms cannot tackle alone.
- **Fragmented Customer Experience:** Disconnected checkout, billing, and subscription logic often lead to a jarring experience for users across different regions and channels.
- **Compliance and Security:** Maintaining robust security and meeting complex international tax and compliance logic requires deep expertise that is often unavailable in-house.

Our Solution: A Tailored Architecture for Growth

Our approach goes beyond standard implementation. We offer a tiered services model designed to meet you exactly where you are in your journey, while pushing the boundaries of what your hardware and software can achieve.

1. Accelerated Implementations

For those seeking rapid deployment, we offer fixed-scope integrations of **Stripe's Optimised Checkout Suite** and **Core Payments**, typically delivered within 4–8 weeks.

2. Complex Billing and Global Scaling

For clients requiring deep integration into downstream systems (CRM, ERP), we provide advanced **Stripe Billing** solutions. This includes architecting **Stripe Connect** for complex payout flows, enabling native fund holding and automated global payouts that replace manual, high-risk processes.

3. The "Art of the Possible" with AI and Terminals

Imagine a world where your payment terminal is a multi-functional tool. Since **Stripe Terminals** are built on Android/iOS, we can build custom apps that support:

- **Smart Retail:** Real-time stock checks and barcode scanning during purchase.
- **Enhanced Engagement:** Live NPS feedback, membership programs, and seamless micro-donations at the point of sale.
- **Agentic Commerce:** Leveraging AI-led agentic commerce to innovate business models and drive ROI through automated decision-making.

5 Clear Benefits Our Clients Are Already Seeing

- 

1 Significant Speed Improvements:
Our implementations have achieved up to a **30% improvement in transaction processing speed**.
- 

2 Reduced Transaction Time:
We have demonstrated a **25% reduction in average transaction time** for hospitality clients, directly improving staff efficiency.
- 

3 Increased Customer Satisfaction:
Faster service and seamless experiences have led to a measurable **30% increase in customer satisfaction ratings**.
- 

4 Global Reach with Ease:
Quickly expand into **50+ countries** using multi-currency support while simultaneously enhancing security and reducing costs.
- 

5 Operational Efficiency:
Automating payout scheduling and reporting significantly reduces manual effort and minimises “minimal lift” from your internal resources.

Is This Solution for You?

If you find yourself saying, “We can’t scale with our current setup,” or “We can’t bolt the old payments process back onto a modern platform,” then this solution is built for you. We align your specific business challenges—whether it’s moving from **On-prem to Cloud, Global Expansion**, or Platform Migration—with a structured, AI-accelerated delivery approach. We don’t just solve the payment problem; we remove the technical debt that hinders your future growth.

Why Insight?

Choosing Insight means partnering with a recognised leader in the Stripe ecosystem.

- **Unrivalled Expertise:** We currently boast more than **100 Stripe-certified payment Engineers, Developers, and Architects**, making us the most certified partner globally at the time of writing.
- **Award-Winning Service:** Amdaris (an Insight company) was awarded **Stripe’s Partner of the Year 2023 for the UK and Ireland**.
- **Elite Accreditation:** We are currently one of only **8 EMEA-wide Stripe-certified partners** to pass the Stripe Services Implementation Specialisation Capabilities Assessment.
- **Thought Leadership:** We currently house one of only **30 Global Stripe Advocate Solutions Architects**.

Our customers, have “been blown away by the speed and quality of delivery”.
