

Elevate end users with Microsoft Surface powered by Snapdragon®

Insight, Microsoft, and Qualcomm Technologies have teamed up to empower employees and enhance business outcomes, delivering future-ready performance, efficiency and value through Microsoft devices powered by Snapdragon processors.

Why Insight for

Microsoft Surface powered by Snapdragon?

Hardware is just the starting point. Insight ensures you unlock maximum value throughout the lifecycle with a robust toolkit of additional capabilities, support and consultancy.

Zero-touch deployment

Devices arrive pre-configured and ready for use, supported by our Sheffield-based integration centre.

Granular security control

We disable cameras and other components, and manage admin controls for highly regulated environments.

Always supported

A single point of contact for rapid problem resolution and escalation to Microsoft or Qualcomm Technologies if needed.

In-depth device insights

Surface Managed Report reveals device health, deployment progress and carbon impact!¹

¹Surface.Management Portal Overview

Free service updates

Insight keeps you aligned to Microsoft's roadmap to ensure ongoing compatibility and compliance.

Expertise on demand

From legacy app modernisation to new application builds, you get the support you need, when you need it.

The Insight Global Advantage

International reach | Local expertise | Fortune 500 member | Top-tier ecosystem

30-years

of delivering successful outcomes with Microsoft technologies.

From readiness to end-of-life, Insight offers full lifecycle services.

Readiness

Discover best practices to ensure optimal outcomes.

End of life

Securely and conveniently dispose of end-of-life devices through our lifecycle services.

Maintain

Manage your Surface inventory through our warehouses and obtain IT support from our Gartner-recognised workplace services.

Deploy

Quickly integrate Surface into your small business through automated deployment features.

Procure

Get the right Surface eCommerce devices efficiently and effectively with Insight's e-procurement and procurement strategies.

Prepare

Prepare to deploy Surface with a custom look and feel through Insight's Integration Lab offerings.

Get hands-on proof

Our Dare to Compare programme gives you the confidence to move forward by experiencing the benefits first-hand.

We place Microsoft devices powered by Snapdragon directly into your environment – seeded or loaned – so you can evaluate performance, security and user experience on your own terms. Then we review your feedback together and help you come to an informed decision.

The Dare to Compare journey

1

Microsoft devices powered by Snapdragon evaluation

Test-drive a Microsoft Surface device powered by Snapdragon within your existing portfolio to benchmark performance and usability side by side.

2

Dare to Compare Workshop series

Session 1: Next-Gen AI (Copilot+) PC Workshop – explore how AI-ready devices can reshape the workplace.

Session 2: Secure & Deployment Workshop – technical deep dive into rollout and security best practices.

Session 3: 30-Day Review – assess real-world experience and agree next steps.

3

Access to exclusive pricing

As a Dare to Compare participant, you'll gain access to our exclusive pricing for evaluating and selecting Microsoft devices for your organisation. Free Windows® Autopilot device registration is included when you buy your devices from Insight.

Spread the cost and access long term savings

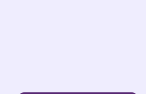

Insight Flex for Devices is a cost-adaptive model that reduces upfront investment while maximising value over the full device lifecycle. With Device-as-a-Service (DaaS) options, you can lower financial risk and benefit from predictable monthly pricing, combined with value-added services such as imaging, deployment, and support desk.

You can even reinvest savings from resale or redeployment into future rollouts. Whether you choose a preconfigured Flex package or a fully customised model, Insight covers every stage – from acquisition and management to disposal and renewal.

IT Operations & Security

Reduce costs
Improve employee experience
Get the right data to make informed decisions
Improve device security

End Users

Work more seamlessly
Get devices when they need them
Have the right devices for their needs

Procurement & Finance

Reduce costs
Understand device fleet TCO
Know where assets are located
Achieve ROI

Stronger together

With Insight's expertise, Microsoft Surface's premium design, and Snapdragon next-generation performance, you gain far more than hardware.

Together we provide:

A secure, modern platform for hybrid work

A service-led model that simplifies management

Cost-effective lifecycle solutions

Direct access to global innovation and support

Insight Advisory Workshop

Insight has developed an in-depth workshop to help organisations explore the benefits of Microsoft devices powered by Snapdragon.

Delivered by our experts, this full-day session explores how these devices can transform workflows, the steps required to ensure readiness, and how to align adoption with security and compliance requirements.
