

Microsoft Hybrid Cloud Security Workshop

Get a customised threat and vulnerability analysis of your hybrid and multi-cloud environment and learn how to build a more robust cloud security system

Overview

Do you have a good understanding of security vulnerabilities in your hybrid and multi-cloud environment, including VMs, databases, Azure storage and more? Are you aware of the number of suspected authentication activities across your multi-cloud environment? In short, are you confident about the cloud security posture of your organisation?

Improve your cloud security posture with a Microsoft Hybrid Cloud Security Workshop

As cloud services continue to grow, cyber risks and threats continue to evolve. Get help achieving your hybrid and multi-cloud security objectives - and identify current threats - by scheduling a Microsoft Hybrid Security Workshop. Given the volume and complexity of identities, data, apps, endpoints, and infrastructure, it's essential to learn how secure your organisation is right now and how to mitigate and protect against threats moving forward.

Our solution

We can help you develop a strategic plan customised for your organisation and based on the recommendations of Microsoft cybersecurity experts. You'll gain visibility into immediate threats and vulnerabilities across Azure, on-premises and multi-cloud environments, plus clarity and support on how to improve your security posture for the long term.

What to expect:

We'll partner with you during this workshop to strengthen your organisation's approach to hybrid cloud security. We'll help you better understand how to prioritise and mitigate potential attacks:

- · Analyse your requirements and priorities for a hybrid cloud security detection and response solution.
- · Define Scope and deploy Azure Defender in the production environment, onboarding servers and other selected services.
- Explore Azure Network Security capabilities and experience selected Azure Network Security products in a demonstration environment.
- · Discover existing hybrid workload vulnerabilities and learn how to reduce the attack surface area.
- · Discover threats to the included hybrid workloads and demonstrate how to investigate and respond to threats.
- · Recommended next steps on proceeding with a production deployment of Azure Defender and Azure Network Security

Pre-Engagement Call	Kick-off Meeting	Cloud Discovery Log Collection	Threat Exploration	Threat Results Presentation	Engagement Decommissioning

Business outcomes

- · Identify current security threats and vulnerabilities in your hybrid and multi-cloud environment
- · Walk away with actionable next steps based on your specific needs and objectives
- Document your security priorities and requirements for the benefit of key stakeholders
- Better understand how to accelerate your security journey using the latest tools

Why Insight?

Today, technology isn't just supporting the business; it's becoming the business. At Insight, we help you navigate complex challenges to develop new solutions and processes. We will help you manage today's priorities and prepare for tomorrow's needs.
