

Solution Brief

Insight's Microsoft 365 Copilot Envisioning Workshop.

Discover the power and value AI can bring to your business

In today's dynamic yet competitive business environment, organisations are looking how best to take advantage of the power of AI to improve the way they do business. The promises of improved productivity, efficiency and creativity must be balanced with mitigating the risks of AI. Introducing AI within any organisation requires careful planning, preparation and readiness to deliver the gains promised without increasing associated security risks.

Prepare for the future of productivity

Microsoft 365 Copilot provides the responsible AI technology to unleash the creativity, improve productivity and deliver the innovations in the way your employees work. But like with any initiative it has to begin with a thorough understanding of the technology, requirements and plan to achieve the returns on investment you expect.

Insight's Microsoft 365 Copilot Envisioning Workshop will provide you with everything you need to understand your journey to leverage this approach to AI in your business and achieve a step change in productivity and collaboration. You will explore various demonstrations on Copilot in action and relevant user opportunities to identify the top prioritised scenarios for your workforce.

What you can expect

The envisioning workshop is delivered in one day and will provide:

- An overview of Microsoft 365 Copilot capabilities, including product demos and Microsoft's approach to responsible AI.
- A review of technical requirements and what's needed to get your organisation AI-ready.
- Identification of key stakeholders and prioritised business scenarios.
- An overview assessment of your organisation's current readiness.
- A recommended roadmap and proposed next steps.

Who should attend?

To get the most out of the envisioning workshop, it is recommended your executive leadership across key functional business areas, IT and security participate.

Our partner  Microsoft
