

CLIENT STORY

Top Independent School enters eSports arena

Story Snapshot

Recognising the increasing relevance of eSports and the benefits it brings to pupils and faculty, West Buckland School wanted to develop a premier eSports facility for existing and prospective students.

To do this, it needed to identify suitable hardware that could support a range of gaming titles.

- Over a dozen PCs required to support the project.
- The school required state of the art tier-1 devices.

Background

As a forward-thinking, leading independent school, known for academic excellence and offering a comprehensive education programme, West Buckland sought to introduce an eSports suite to enhance students' learning and build inclusivity. It engaged with Insight as its trusted technology advisor to find the right high-performance and cost-effective solution.

Challenge

Recognising the growing significance of eSports and the wider benefits of inclusivity, West Buckland School looked to introduce a dedicated programme.

Its most significant challenge was shifting traditional mindsets while, at the same time, finding a suitable space for the new venture within its mix of historic and contemporary facilities.

Prioritising powerful graphics capabilities, the school approached Insight on how best to create a facility complete with equipment that enabled students to pursue their passion for gaming in a unique environment.

Modern Workplace

"Insight has been a fantastic partner for our technology upgrades. They're always offering fresh ideas and willing to work with us to find the perfect solution. Their responsiveness and flexibility are crucial for meeting our school's needs."

James Hart Prieto – Head of Digital

"eSports isn't just about playing games. It's about fostering teamwork, strategic thinking, and a sense of community. Thanks to Insight, West Buckland now provides students with a space to develop these skills in a competitive, yet inclusive and supportive environment."

Phillip Stapleton, Headmaster, West Buckland School

Solution and Outcome

West Buckland School partnered with Insight to create a top-tier eSports facility. Insight played a consulting role in helping the school to select the partner, Lenovo, and the hardware, Lenovo's Legion computers, equipped with NVIDIA 4060 Ti graphics cards, ensuring exceptional performance for both competitive gaming and demanding creative software like Adobe Suite and SolidWorks. Backed by a five-year warranty, the investment demonstrates commitment to longevity and adaptability.

West Buckland chose the Lenovo Legion range for its reputation as a recognised and trusted brand within the gaming industry. This ensured a high level of performance and reliability, crucial for a demanding eSports environment. Additionally, Lenovo's willingness to support the school with branding and potential sponsorship opportunities further solidified the partnership.

The facility goes beyond eSports, serving the school's broader needs in design, music production, and even Combined Cadet Force (CCF) flight simulation training. This versatility maximises the impact of the investment. West Buckland's team is primed for success, with aims of competing in the British eSports Championships Series in titles League of Legends, Rocket League, and Overwatch.

Beyond competition, the eSports programme serves as an attractive element for prospective students, supporting initiatives like eSports camps, designed to offer immersive gaming experiences and multifaceted eSports education to not just pupils, but the wider community.

Why Insight?

West Buckland School's longstanding partnership with Insight made it the natural choice for advising on the new eSports facility. The school valued Insight's heritage, its comprehensive tech solutions and its commitment to finding the best fit for its unique needs.

Having delivered on projects in the past, West Buckland School knew that Insight would deliver a competitively priced solution and work to deliver the best possible value. Insight's dedication to West Buckland's success was key.

10%

Puts West Buckland in top 10% of independent schools providing state of the art facilities.

RESULTS IN NUMBERS

The school's investment is secured by a five-year warranty on all hardware components.

The programme has the potential to benefit over 700 students across design, music, CCF and competitive gaming.

West Buckland's programme enables students to be trained in three competitive titles.
